

Lab 6

Part 1

- Switch Statement ?
 - too long
- Convert String to character array
- Check if character is a letter, lower case
- Shift character
- Put new character back into array.
- Error, characters changed to symbols
 - fix: check if greater than 'z'. If so -26 from character.
- Error, can't get spaces to work

Tests

helloworld - 3 = khoorzruog

quickbrownfox - 10 = aesmulbygpyh

whisper - 1 = xijtqfs

Lab 6

Part 2

- Read file words.txt
- Use `map<string, bool>` to store words from words.txt
- Test taking file words and putting into array. Error: only get back 'ZZZ'
- Try printing one individual line. Error: '0'

Lab 6

Part 3

- Similar approach as Part 2
- Can't fix individual words.

Lab 6

Part 4

- o System Error.
- o Couldn't fix.
